

Activity 2 – Creation Care

While there have been less cars on the road, have you noticed that nature has thrived? Maybe you've already been planting things or watching the wildlife? Or perhaps you've seen the garden page on our website where our church family have been sharing their beautiful gardens with us? It all means we're helping to play our part to look after God's creation...and it's good for our own spiritual growth too!

Activity:

Plant any seeds you like and with care, watch them grow. If you don't have much room, many smaller plants can be grown on a window sill.

You may like to plant an individual seed for each of your family and friends. Perhaps you could pray over them when you water them and think of everyone you love?

What you will need:

- Seeds (any kind)
- A pot

Whatever you choose to plant, we'd love to see photos of what you grew. Maybe take a photo each week so you can look back and see the change.

Extra activities:

1. Why not take part in Butterfly Conservation's "Big Butterfly Count"? All you have to do is spend 15 minutes watching for butterflies and moths before Monday 10th August and add your counts to their website. This will help experts assess the health of our environment.
2. Why not feed the birds or butterflies in your garden? Butterflies love fruit which is over-ripe so instead of throwing leftovers in the bin, why not feed the butterflies?
